SEATTLE MAN AFTER UTAH'S GREAT IRON MINES.

Pumps Drawn and Works Put

in Charge of Watchman.

CLOSED DOWN

The Johnny gold mine at Stateline has been closed down, the pumps Salt Lakers Who Are Going After the drawn and the men employed at the property have been discharged and the works have been placed in charge of a watchman.

After spending some little time at the property and satisfying himself that there was little in sight but discouragement and heavy expense, Manager Frank Wilson took the action stated and returned to the city yesterday morning. When the proposition will be tackled again, if ever, is not known, but it looks as though the proposition had been given up as a bad job and the people of the camp are exceedingly

blue as a result. month or two ago the mill was closed down and the management an nounced at the time that it was the intention to develop at greater depth and block out more ore before starting Larger pumps were installed and it has been reported very recently that the mine was opening up well. In the face of these reports, none which have been officially made, however, the news that the property has been abandoned will come as a shock to everybody in mining circles who have watched the career of the proposition since the Dooleys sold out, the impression having become well set-tled that when everything was in shape the mine would make a record as a gold producer that would attract witle

Manager Wilson could not be found during the afternoon, but Secretary W. J. Halloran stated that it was true that the mine had been closed and the pumps drawn. He also said that much as he regretted it, it was impossible to say when it would be started again, acknowledging that it had been some-

what of a disappointment.

The shareholders of the company are not many. Frank Wilson, Frank D. Clift, W. J. Halloran, Henry Newell and two or three others being the owners of the bulk of the stock. To the business men of Stateline the close down means the practical abandon their having to pull out.

AFTER THE IRON MINES.

Seattle Man Takes Options and Tries For Everything in Sight.

The Bull Valley iron mines now seem in a fair way of being sold and that Colonel S. B. Milner's iron and coal mines are not included in the deal is only because he declined absolutely to place a price on the properties at this William Loudon of Seattle left ng secured a thirty-day option on the Lund-Greggerson mines in Bull valley, Whether he succeeded in tying up the learned, as Mr. Page has been detained in the southern country through sick-ness in his family.

Mr. Loudon, with an expert, has been going over the iron deposits of the southern portion of the state for several weeks, but who he is representing in the effort to buy all the iron in that section he has not made plain. He has declared, however, that his "associates" were fully competent to carry through any deal entered upon, even hough it involved many millions of

"I never met or heard of the gentle-man until Wednesday." said Colonel Milner when questioned yesterday aft-ernoon, "and I really do not know just what to make of his visit. He told me that he was familiar with the iron properties owned by me; declared the deposits of both iron and coal were much greater than he had had any notion they were before coming here, and finally asked me to place a price upon them. This was after I had met him in the land office and following a upon them. This was after I had met him in the land office and following a long talk in my office. When he found that there was no chance to have me make a price we parted for the day and, as I supposed, for good.

"Yesterday morning, however, he called me up by 'phone before I had left the house and stated that he wished to see me before he left for Seattle. I was delayed in getting down town and when I reached the office it was about time for him to leave and catch his train, so I had no chance to talk to him again. To my son, who reached the office ahead of me, he again urged that a figure be named on our iron and coal. No satisfaction was given him and he left."

was given him and he left."

At any rate, whoever Mr. Loudon is, he has succeeded in getting a call on at least a portion of the magnificent iron deposits of Bull valley, and he has done the best he could to get a price placed on the Cedar mines of Colonel Milner, including the Price coal mines owned by the latter and S. H. Gilson. When he tries again he will likely have reached the conclusion will likely have reached the conclusion that if he expects to do business he will first need to disclose the identity of his "associates," or at least show that he and they are capable of doing what he claimed they were able to do, if given a chance. LATEST GOLDFIELD STRIKES.

Week's Disclosures in Jumbo, Daisy,

Fraction and Sandstorm. Ore worth \$1.000 a sack is being taken from the drift on the 200 level of the Bowes-Kernick lease on the Jumbo. In this drift a body of ore has been encountered which at present shows five feet wide and will assay \$7.000 a ton, says the Goldfield News.

feet wide and will assay \$1,000 a ton, says the Goldfield News.

Wonders, it seems, never cease with the great Jumbo and this is the greatest of all, It means that the figures of \$1,000,000 as the production of the Bowes-Kernick-lease, given in the News two weeks ago, were not an exaggeration. It even looks as if they will be exceeded. Thousands of sacks of ore air now piled up around, the ore house at this lease and a large number of men are kept busy sorting and sacking all the time. The Jumbo is the wonder of the mining world—the marvel of the "greatest gold camp ever known."

A strike which it is no exaggeration to call phenomenal was made Tuesday in the Daisy Fraction, one of the Diampndfield Gold Mining company's claims at Diamondfield and adjoining the Great Bend. It is the richest yet made in that section.

The strike was made in the company

The strike was made in the company ground. At a depth of eight feet in the shaft a quartz ledge four feet wide was struck and samples of the ledge gave an assay of \$1.650. struck and samples of the ledge gave an assay of \$1.650.

This strike follows one made last week in the Reilly & Krise lease on the Quartz-tie Praction, one of the same company's claims. The Daisy strike is said to be far richer than the other, but has not been opened to such an extent.

The week's developments on the Gardner, Oddie and Duffield lease on the sandstorm show that the strike as reported last week wonderful as it was, did not exceed what the facts justified.

The only error was in reporting the

when it is really on the Kendall, an ad-joining one and belonging to the same group and the same company. This week's operations at the lease

This week's operations at the lease have been devoted to screening and shoveling up the surface dirt and sacking it for shipment. This sounds strange but will hardly be called so when it is known that this dirt is worth 3000 at on. Eight men are at work and last night there were 225 sacks of this rich top stuff piled up—about \$10,000 worth. The ground is being cleared over an area of about forty feet square and all the pannings made are rich—some fabulous, leaving the bottom of the pan plentifully sprinkled with small nuggets. It really looks like a placer mine.

Besides this there is a well defined ledge running through the ground, eighteen inches of which is shipping ore, with streaks running through the vein which are nearly rich enough to be minted. It is so wonderful that few would believe without seeing. And many have seen since the strike was made. HARD BLOW TO STATELINE

GREAT BEND STARTS UP.

Ores at Goldfield.

Ores at Goldfield.

Word from Vivian P. Strange, manager of the Great Bend company's property at Goldfield, is to the effect that operations were begun Monday morning in the shaft, which is now down seventy-five feet, and where there is exposed several feet of ore worth over \$300 per ton. The full width of the ledge has not yet been determined, and it is therefore the intention to do further crosscutting before beginning the exploration of the ledge along its strike. The Great Bend property lies between the Sandstorm and other properties near Diamondfield, in which fabulously rich strikes have been reported during the past few weeks, and the Salt Lakers who control the Great Bend are sanguine of opening just as big a mine as any of hem.

Interest in the great gold came is such

Interest in the great gold camp is gath-Interest in the great gold camp is gathering strength here every day, and many mining men are sparring for footholds there. Early in the week Patrick Sheehan of the Johnny, accompanied by Isaac Hazelgrove, pulled out for the diggings, and on Monday next Jerome B. Wheeler of the South Swansea and Hugh Trenam of the Stockton company will leave for that section of Nevada. Next week Peter Porter of the Great Bend will leave, and a little later Frank B. Cook of the same company will pull out.

REORGANIZATION PERFECTED. New York-Tonopah Property Will Now be Actively Developed.

Now be Actively Developed.

A letter from the San Francisco offices of the New York-Tonopah Consolidated company brings the information that the reorganized company is now down to business and that work at the property is to be commenced at once. Stock in the new company is now being issued to shareholders of the old company on the basis of one share for two. This basis provides 500,000 shares of treasury stock, one-half of the capitalization, and the statement is made that enough of this stock has already been soid and subscribed for to guarantee the steady operation of the mine for a long time to come.

come.

The property is equipped with one of the best hoisting works in the district, the shaft is down to the 700-foot mark and the intention is to go right on down to the 1,000-foot level without a stop and then begin crosscutting the ledges known to exist in the claims. In the work already done several stringers of fine ore, believed to be feeders from one of the main ledges, have been encountered, and no doubt exists in the minds of those conversant with conditions that a big mine will be developed. The company as reorganized is composed of several strong operators, and before the year closes good news is promised from the mine.

MAKING IT WIN.

Leasers Are Bringing Out the Mon-

terey at Silver City. A. L. Hamlin the well known con-ractor, who owns the Monterey property n Dragon hollow, close to Silver City, lintic, is in high spirits over the showing Tintic, is in high spirits over the showing being made in the property by leasers. A car of nice ore was settled for on their account yesterday, and he says the showing is such that a carload or more per month is now assured. The ore now being mined comes from a depth of only forty feet below the surface, but the shoot is going down strong, and as the shaft is down to a depth of 250 feet, he expects that a great deal of ore will be mined during the fall and winter months.

The present lease runs for only a month or two longer, but at its expiration, he says, some arrangements will be made to keep the property in operation, though he was non-committal as to who would be the lucky men to get the next lease, Mr. Hamlin has hung on to the properity for ten or twelve years, and while considerable ore has been shipped from it in Jays gone by, he is still a great deal behind on the proposition. He is congratulating himself that something is beginning to come of it, and hopes to get all his money back with interest now.

MINING STOCK EXCHANGE.

Regular Morning Call Goes Through Without a Sale.

The fifty odd stocks in the list of the mining exchange were called yesterday morning without a sale being made. During the open board session following forty shares of Daly-West went at \$14 and 1,000 Martha Washington at \$4c. The afternoon calls were just about as dead. May Day was sold at 6%c to 7c, Butler-laberal came out with 500 at 10c and for 1,000 Tetro 271/2c was paid on the open board.

No one appeared to be able to account or the lifeless condition of the market, nough it was looked upon merely as a temporary lull.

The total amount of stock changing hands during the day was 9,040 shares, the selling value of which was \$1,240.63.

Following is the list of final quotations.

CALL LOAN RATE WAS MARKED

UP 2 PER CENT. .

New York, Sept. 15.—1t is difficult to apply any news that came to hand today as a motive for the active operations which again distinguished the trading at the stock exchange and for the mixed movement of prices. The market started upward with a comprehensive sweep that suggested a continuation of yesterday's movement, but it became spotty and irregular again in the later trading. The profit-taking was so general as to suggest again the purpose of support in the marking up of picked stocks here and there in the list. The advances were not calculated to inspire credence and added to the suspicion of a fictitious nature for some of the movements. The continued advance of Pennsylvania and the United States Steel stocks was the most influential factor in shaping sentiment on the general market and was fairly effective in supporting the level of prices in the face of profit-taking in some of the stocks which have made previous striking advances.

stocks which have made previous striking advances.

Aside from reports of a growing expansion in the needs of steel products there was no news concerning either property, unless it was the denial of a report current yesterday of the placing of additional orders for 100,000 tons of steel rails for the Harriman railreads. There were rumors of an important short interest in the United States Steel stocks which was making difficulties in covering and the urgent demand for those gave plausibility to the report. Last night's frosts were reported to have fallen as far short of the decade damage to corn as those of the night before, but the grangers and Pacifics were distinctly heavy after the opening. Another source of uneasiness was the marketing of a large block of Colorado Fuel which had the appearance of an order to sell at the market. St. Paul wearest belief by the strength of the strike of of the st large block of Colorado Fuel which had the appearance of an order to sell at the market. St. Paul was not helped by its annual showing of net earnings, and Smelting's increased carnings for the year resulted in a decline for that stock. It was asserted that freight traffic on the trunk lines was becoming heavy.

The full foreign trade statement for August partly offset the unfavorable impression caused by the showing of exports for domestic products. That showing, it will be remembered, showed a shrinkage of \$7.689,282 compared with the preceding August, while the total exports show an increase of \$3.241,624, the inference being that the discrepancy is made up by a growth of manufacturing exports. This is supposed to point to increased stell exports. reased stell exports.

Three cars of ore from Tintic, one from Bingham and one from Idaho were released from the Taylor & Brunton sampler yesterday morning. exports. This is supposed to point to increased stell exports.

The marking up of the call loan rate to 2 per cent evidently foreshadows a further shrinkage in the bank surplus and was an influence in the growing weakness of the stock market which carried the grangers and Pacifics and a few of the eastern stocks a point or more below last night and largely reduced the gains elsewhere. Bankers loan bills also made their appearance in the foreign exchange market and forced down the sterling rate suggesting the likely source of relief for any marked growth in the demand for money. The stock market closed easy.

Bonds were firm. Total sales, par value, \$4,555,000. United States bonds were unchanged on call. The Yampa Smelting company is awarding contracts for the material that is to enter into the construction of its second furnace and the intention is to have it delivered within sixty days. Lemuel Woster passed through the city yesterday on his way from Cripple Creek to Mountain City. He owns considerable property in the northern Nevada camp and has gone on to begin operations upon it.

The Eagle Eye Mining & Milling company resterday filed articles of incorporation with the county clerk. The incorporators are A. C. Lee, Louis D. Ensign, B. A. Midgley, Albert R. Johnson and John J. Peterson. The capital stock is \$50,000. divided into 500,000 shares.
